5 Top Trends for your Kitchen in 2018

It's your home's focal point. The site of some of your best moments and the base of operations for entertaining — it's your kitchen, and no room in your home is more valuable. A magnificent kitchen defines a home, and bringing your kitchen to this level means capitalizing on today's top trends.

Many of the trends that will define kitchens for the year appear first at KBIS, the kitchen and bath industry convention held every year in January. More than 600 brands attended this year's event, and here are the five trends that stood out from the show and are sure to dictate kitchen styles for the rest of this year and beyond.

Spring cleaning: 6 areas to repair, replace and refresh

Spring is one of the most popular times of year to clean up your home inside and out, make renovations and take steps to ensure it operates efficiently for the rest of the year. But after the long winter months, the list of projects can pile up. This year, focus on six key areas to repair, replace and refresh around your house now – to avoid spending more time and money later.

1. Repair your roof and gutters. Inspect the roof to check for loose or cracked shingles.

New Home, New Floors! Examining Your Options

Whether you've owned your house for a day, a year or a decade, picking the flooring you're going to have to live with for a while can be stressful. There are so many materials available and within those, a huge array of colors and designs. It's the paradox of choice at work, you have so many options you may literally freeze. That's why we're going to break it down for you, in hopes that the overwhelm is minimized when your time comes. paint colors. Since you don't know what the color will look like in your home until the project is totally done and the
